

# Sprint 1 Report

Product: Planted!

Team Name: Planted!

10/20/19

## Actions to stop doing

- The team should stop underestimating the ramp-up time it takes to get used to a new technology such as Flutter, and mobile development because we did not get as much done as we wanted to in this sprint.
- The team should stop skipping Scrum and/or general meetings in order to have all team members be on the same page in regards to work that's been done/needs to be done.

## Actions to start doing

- Get estimates from all team members on the number of hours they're able to work each week since several user stories were unable to be completed
- Better estimate the amount of work a task/user story takes because many user stories/tasks were unable to be completed
- Have better communication among team members regarding when we're meeting, who can/can't come to meetings, etc. because sometimes this information wasn't communicated clearly to everyone
- Establish clear expectations on who will be doing what and quantitatively what one's work will result in as a way to prevent duplicate work
- Communicate additions and updates made to files in GitHub, to prevent duplicate work, or not doing work with the expectation that someone else is doing/has already done it.

## Actions to keep doing

- Meet three times a week (MWF), as we believe that this is the best way to get updates from all team members on their progress for user stories
- Communicate—we're doing a good job of communicating where we stand on our user stories, and what we still need to do to move forward in the project.
- Constantly updating our Scrum board on Trello because it helps us get a good sense of our team-wide progress
- Being kind and understanding with each other, not getting frustrated or condescending in order to ensure that team morale is high

## Work completed/not completed

- Completed:
  - None

- Not completed
  - As a basic user, I want to be able to create a profile so I can have my data saved
  - As a basic user, I want to be able to change my settings, so that I can modify my profile
  - As a basic user, I want to be able to log into my profile, so I can have my data saved

### **Work completion rate**

The final sprint burnup chart for the previous sprint should be available for viewing in the lab and an email of this chart sent to the TA/prof

- Total user stories completed: 0
- Total estimated ideal work hours completed: 7
- Total number of days: 8
- User stories/day: 0
- Ideal work hours/day: 10
