

Sprint 2 Report

Product: Planted!

Team Name: Planted!

11/3/19

Actions to stop doing

- Absence of team members at scrum meetings/TA meetings because it's important that all team members are on the same page
- Pushing off tasks because we've made little progress on user stories

Actions to start doing

- Having all team members add to the app functionality, as our progress on completing user stories is extremely slow
- Assigning tasks to ourselves so we know what tasks are in progress to completion

Actions to keep doing

- Meet three times a week (MWF), as we believe that this is the best way to get updates from all team members on their progress for user stories
- Updating our scrum board on Trello because it's important to get a visual update of our team's progress on tasks

Work completed/not completed

- Completed: None
- Not completed:
 - As a basic user, I want to access a database of plants for inspiration and plant identification
 - As a basic user, I want to be able to add a plant to my profile, so I can keep track of how many/what I have.
 - As a basic user, I want to be able to see the care information about plants, so I can care for them/increase my knowledge

Work completion rate

The final sprint burnup chart for the previous sprint should be available for viewing in the lab and an email of this chart sent to the TA/prof

- Total user stories completed: 0
- Total estimated ideal work hours completed: 6
- Total number of days: 7
- User stories/day: 0
- Ideal work hours/day: 10
